

The first WHERE clause example use the **tilde asterisk (~*)** to perform a case insensitive match on the regular expression **(lade|lare)** to find any county names that contain either the letters lade or late.

```
SELECT county_name
FROM us_counties_pop_est_2019
WHERE county_name ~* '(lade|lare)'
ORDER BY county_name
;
```

county_name text

Bladen County
Clare County
Clarendon County
Glades County
Langlade County
Philadelphia County
Talladega County
Tulare County

The second WHERE clause example also uses the (~*) as well as a **negated tilde (!~)** to find county names containing the letters ash but excluding those that include Wash.

```
6
7 SELECT county_name
8 FROM us_counties_pop_est_2019
9 WHERE county_name ~* 'ash' AND county_name !~ 'Wash'
10 ORDER BY county_name
11 ;
```
