

General CASE syntax is as follows:

```
CASE WHEN condition THEN result
WHEN another_condition THEN result
ELSE result
END
|
```

Example:

```
1 SELECT max_temp,
2     CASE WHEN max_temp >= 90 THEN 'Hot'
3         WHEN max_temp >= 70 AND max_temp < 90 THEN 'Warm'
4         WHEN max_temp >= 50 AND max_temp < 70 THEN 'Pleasant'
5         WHEN max_temp >= 33 AND max_temp < 50 THEN 'Cold'
6         WHEN max_temp >= 20 AND max_temp < 33 THEN 'Frigid'
7         ELSE 'No Reading'
8     END temperature_readings
9 FROM temperature_readings
10 ORDER BY station_name, observation_date;
```

Data Output Messages Notifications

	max_temp integer	temperature_readings text
1	31	Frigid
2	34	Cold
3	32	Frigid
4	32	Frigid
5	34	Cold
6	38	Cold
7	40	Cold
8	45	Cold
9	44	Cold
10	28	Frigid
